An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Sandt on 11/19/07.

35. (New) A device for assaying a fluid for the presence or absence of different analytes comprising:

(A) a base having adjacent slots therein of sufficient length for insertion of a test strip therein, wherein each slot is defined by (a) a floor, (b) raised walls depending upwardly from the floor to separate each adjacent slot from the next, and (C) at least one open end;

(B) a multiplicity of test strips having an upstream and a downstream end, wherein a single test strip is inserted into each slot of the base so the upstream end of each test strip protrudes out of the open end of each slot, and wherein each test strip has a test zone and a control zone therein, and each test zone contains a binder specific for a different analyte;

(C) a cover attached to the upwardmost surface of each raised wall of the slots of the base and extending to the open end of said base, wherein the cover retains the test strips within the slots and has a first transparent window formed therein through which the test zone and the control zone of each of the test strips can be viewed;

(D) said base and said cover forming the housing for said test strips extending beyond that housing; and

(E) a removable cap over said base and cover enclosing the protruding ends of the test strips extending beyond the housing, the cap also containing a sample port and opposing said port a base having a raised bar therein which defines a fluid reservoir

beneath the sample port whereby the fluid analyte sample may be applied to the protruding ends of the test strips when in place over the strips.

Claim 36 has been canceled.

The following is an examiner's statement of reasons for allowance: The cited prior art fails to teach or suggest a test strip holding device with a plurality of slots for holding a plurality of test strips where the end of the strips protrude out of the holding device and a removable cap containing a sample port and opposite of the port a base having a raised bar therein defining a fluid reservoir beneath the sample port such that sample can be applied to the protruding ends of the test strips when the cover is in place.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Tuesday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
